SQUARE BALE WRAPPER

www.mchale.net

The Professional Choice

The McHale 998 square balewrapper is the versatile solution for wrapping square bales. Common sense design, quality components and precision engineering make the 998 the trusted choice for contractors and farmers who demand high output and consistence performance in all conditions and terrain. Packed with features including conveyor loading and fast positioning of the square bale into the wrapping position, hydraulically operated cut and tie system, auto bale levelling and a two point linkage mounted, swivel head-stock. The 998 wraps all bale sizes from 80cm X 70cm to 160cm X 120cm including double bales. The in-cab control unit enables the operator to change bale sizes and select the desired number of film layers. When set, one touch of the auto start button operates the complete cycle from start to finish. The patented roller angle measuring device gives a consistent and even wrapping regardless of the bale size or shape and also allows for extra care wrapping.

PTO Power

The McHale 998 square balewrapper has a fully integrated, PTO driven load-sensing hydraulic system. This simplifies tractor changeover and gives consistent working every time, eliminating problems with differing tractor hydraulic systems, oil flows, standards and temperature of oil.

Cut & Tie

The McHale hydraulically operated Cut and Tie System, cuts and holds the film in all weather conditions with the maintenance free, automatic accumulator priming. This time saving device eliminates the need to manually re-attach the film always holding it ready for the next stage.

Dispenser

The unique McHale film dispenser keeps the angle of the dispensing unit constant during the wrapping process. This ensures consistent stretch throughout the different side lengths of the bale. It also features the quick fit film mechanism now common to all McHale machines.

Expert Control Console

Fast Conveyor Loading

Lifting Bale to Wrapping Position

Accurate Rotation of Bale While Wrapping

optional extras...

998 Unloading Conveyor Up

998 Unloading Conveyor Down

Conveyor loading of double bale

Wrapping of double bale

Simultaneous loading & wrapping

MHale SQUARE BALE WRAPPER

McHale has evolved from a farm machinery retail outlet, which is still in existence today. This background has provided an excellent foundation for the design and manufacture of farm machinery, due to direct contact with the end user. Manufacturing takes place in a purpose built facility, which utilises the latest in laser and robotics manufacturing technology and operates to ISO 9001/2008 accreditation.

All research and development is conducted inhouse using leading edge technologies. Machines go through rigorous testing during the product development process and machine performance is constantly monitored. As a result, this ensures that product of the highest quality, specification and design are delivered to you. Which explains why a McHale product is truly "an investment in the future".

Trailed Model [Square] 998 7.30 m (24') 2.92 m (9'7") 3.5 m (11'6") 3875Kg (8,680 Lbs) 16.0/70-20 12 ply Cat II/III lower linkage SAE 6 spline PTO Shaft 500 - 800 RPM Transport Length Transport Width Transport Height Weight (unladen) Wheel Dimensions

Attachment to Tractor P.T.O. speed

Hydraulic req: 1 double acting spool valve 1 single acting spool valve Hydraulic drawbar Floating conveyor Film Layers: Operator selected - 2/2+2/2+2+2 (2 - 8 layers) **Electrical Requirements** 12 volt DC @ 5A Electronic Control Box

Bale Sizes From 80cm x 70cm to 160cm x 120cm including double bales Max Bale length 180cm

Standard Equipment

Drivers Control

2 x 750 mm dispensers Self contained load sensing hydraulic system Conveyor pick up, loading and unloading Fully automatic electronic operation In cab control of bale size and film layers Automatic Cut & Hold Low ground pressure tyres Brakes and lights

Hydraulic drawbar **Optional Equipment**

Remote Control kit Round Bale Kit **Unloading Conveyor**
